**I Claim:**

1. A method, comprising the steps of:
  - (i) a post system monitoring a transaction between a buyer and a seller;
  - (ii) the post system notifying a lender of a transaction status.
2. A method as claimed in claim 1, wherein the buyer and seller initiate the transaction over a distributed system.
3. A method as claimed in claim 1, wherein the transaction comprises a purchase of a merchandise item or service by the buyer from the seller.
4. A method as claimed in claim 1, wherein the transaction status comprises confirmation of an order, cancellation of an order, or completion of delivery of the merchandise item or service.
5. A method as claimed in claim 1, further comprising the step of confirming that the buyer has approved the transaction.
6. A method as claimed in claim 2, further comprising the step of confirming a delivery plan.
7. A method as claimed in claim 1, further comprising the step of receiving a request for factoring.
8. A method as claimed in claim 1, further comprising the step of signaling the lender to release factoring funds to the seller.
9. A post system, configured to:
  - (i) monitor a transaction between a buyer and a seller; and
  - (ii) notify a lender of a transaction status.
10. A system as claimed in claim 9, wherein said system is further configured to monitor a transaction between a buyer and a seller initiated over a distributed system.
11. A system as claimed in claim 9, wherein said system is further configured to monitor a transaction between a buyer and a seller for purchase of a merchandise item or service by the buyer from the seller.
12. A system as claimed in claim 9, wherein said system is further configured to notify a lender of status comprising confirmation of an order, cancellation of an order, or completion of delivery of a merchandise item or service.
